

Honeywell
Refrigerants

Low GWP Refrigerants: Best Practices for a Smooth Transition

ATTENDEES WILL LEARN:

- A review of regulatory legislation – where we have been, where we are, where we are going
- Properties of A2L refrigerants
- Technology Transitions Rule
- Why R454B?
- Changes to Ruud equipment
- Best practices for installing and servicing equipment containing low GWP refrigerants

Tradeshow*

WHERE

**Doubletree by
Hilton Fort Myers**

13051 Bell Tower Drive
Fort Myers, FL 33907

MEET OUR INSTRUCTORS:

Rob Howard – CEO and President, EV Dunbar Co.

Rob, a seasoned HVAC/R professional, has led EV Dunbar Co since 1999, navigating regulatory changes and refrigerant transitions across the southeast. With a Bachelor of Science in business management from Clemson University and an MBA from Kennesaw State University, Rob is actively involved in industry associations, including HARDI and ASHRAE, shaping the future of the industry.

Jamie Fore, District Technical Representative, Ruud

Jamie, a Ruud District Technical Representative (DTR) in the southeast, brings over 15 years of experience in wholesale distribution, specializing in training and technical services. With a degree in Air Conditioning and Refrigeration, he emphasizes the importance of continuous learning for success. Based near Birmingham, AL, Jamie resides with his wife and four daughters.

Wade Hadaway, District Sales Manager, Ruud

Wade, transitioning from Ruud service technician to District Sales Manager, boasts a wealth of HVAC expertise. Recognized as Ruud Trainer of the Year in 2016 and District Technical Representative of the Year in 2020 and 2021, Wade holds industry certifications and a Georgia Conditioned Air License, contributing to his success.

NATE Continuing Education Class

Nate credits are available for attendees who score 70% or higher on the test administered after the presentation. Contractors meeting this criterion will receive a certificate of completion that can be submitted to NATE for CEU credits.
